Journal of Fluid Mechanics Volume 400 10 December 1999

S. Ghorai & N. A. Hill	Development and stability of gyrotactic plumes in bioconvection	1
R. E. Khayat	Finite-amplitude Taylor-vortex flow of viscoelastic fluids	33
L. Davoust, M. D. Cowley, R. Moreau & R. Bolcato	Buoyancy-driven convection with a uniform magnetic field. Part 2. Experimental investigation	59
C. Evangelinos & G. E. Karniadakis	Dynamics and flow structures in the turbulent wake of rigid and flexible cylinders subject to vortex-induced vibrations	91
P. W. Duck, S. R. Stow & M. R. Dhanak	Non-similarity solutions to the corner boundary-layer equations (and the effects of wall transpiration)	125
L.-P. Wang, S. Chen & J. G. Brasseur	Examination of hypotheses in the Kolmogorov refined turbulence theory through high-resolution simulations. Part 2. Passive scalar field	163
E. Azanza, F. Chevoir & P. Moucheront	Experimental study of collisional granular flows down an inclined plane	199
D. L. Koch & A. S. Sangani	Particle pressure and marginal stability limits for a homogeneous monodiperse gas-fluidized bed: kinetic theory and numerical simulations	229
A. G. Walton & R. A. Patel	Singularity formation in the strongly nonlinear wide-vortex/Tollmien–Schlichting-wave interaction equations	265
J. Imran, G. Parker & C. Pirmez	A nonlinear model of flow in meandering submarine and subaerial channels	295
I. Sezai & A. A. Mohamad	Three-dimensional double-diffusive convection in a porous cubic enclosure due to opposing gradients of temperature and concentration	333
V. K. Kedrinskii & V. V. Nikulin	Convergence of a cylindrical liquid shell and formation of a bore in a rotating fluid	355

BOOK REVIEWS

Atmospheric Dynamics, by J. Green 375

Hydrodynamics of Pumps, by C. E. Brennen 376

INDEX TO VOLUME 400 379

SCHEDULE OF INTERNATIONAL CONFERENCES ON FLUID MECHANICS 380

CAMBRIDGE UNIVERSITY PRESS

Cambridge Journals Online
www.journals.cup.org

0022-1120(199912)400;1-F
